

6th Grade

SCIENCE

Academic Vocabulary Terms

- | | |
|-------------------------------------|-------------------------------|
| 1. classifying | 23. biotic |
| 2. communicating | 24. carnivore |
| 3. control | 25. carbon cycle |
| 4. dependent variable | 26. carrying capacity |
| 5. experimenting | 27. cells - (cell wall, etc.) |
| 6. hypothesis | 28. cell organelles |
| 7. independent/manipulated variable | 29. chemical energy |
| 8. inquiry | 30. chromosome |
| 9. interpreting | 31. climate |
| 10. mass | 32. commensalism |
| 11. measuring | 33. conservation of energy |
| 12. modeling | 34. control |
| 13. observing | 35. density |
| 14. qualitative change | 36. dependent variable |
| 15. qualitative observation | 37. DNA |
| 16. quantitative observation | 38. ecosystem |
| 17. quantitative change | 39. electric current |
| 18. safety | 40. electric energy |
| 19. serial order | 41. electromagnet |
| 20. volume | 42. energy pyramid |
| 21. abiotic | 43. energy transformation |
| 22. atoms | 44. food web |

- | | |
|---|---------------------------------------|
| 45.forms of energy (heat, light, etc.) | 57.photosynthesis |
| 46.herbivore | 58.potential energy |
| 47.hypothesis | 59.qualitative change |
| 48.independent variable | 60.quantitative change |
| 49.kinetic energy | 61.symbiosis |
| 50.levels of organization | 62.thermal energy |
| 51.magnetic field | 63.variables (independent, dependent) |
| 52.mitosis | 64.volume |
| 53.mutualism | 65.water cycle |
| 54.niche | 66.wave |
| 55.organisms(multicellular and unicellular) | |
| 56.parasitism | |
